Education

B.Sc. in Computer Science and Engineering

University of Dhaka

Experience

Software Engineering Intern

Ohkuchi Electronics

February 2026

Kagoshima, Japan

- Contributed to industrial automation and AI-based vision system development.
- Collaborated with hardware and systems teams to test the solution on factory devices and field samples.

Python AI Trainer

SuperAnnotate

Oct 2024–Present

Remote

- Build and refine AI training data, evaluate model outputs, and provide feedback to improve model performance.

Database Architect

Department of CSE, University of Dhaka

Jan–Dec 2025

Dhaka

- Designed a normalized PostgreSQL database, developed advanced SQL queries, and integrated backend services with a Next.js frontend for academic and financial operations.

Bangla AI Trainer & QA

Scale AI

Jan–Aug 2024

Remote

- Created and refined Bangla training data, evaluated AI responses, and supported quality assurance and RLHF workflows.

Technical Skills

Frontend React, Next.js, JavaScript

Backend & Data Node.js, Spring Boot, FastAPI, Java, Python, SQL, MySQL, SQLite, PostgreSQL, Oracle

Agentic AI Workflow automation, LLM integration, prompt engineering, RAG, chatbot development, Hugging Face, OpenAI API, Ollama

DevOps & Tools Docker, Git, GitHub, Linux, Nginx, VS Code, IntelliJ, LaTeX

Research

Green AI and Federated Learning — Studying the energy demands of large-scale AI and exploring distributed learning approaches that reduce training cost and carbon footprint.

Selected Projects

DrawSync – Multiplayer Drawing Game

[GitHub](#)

- Built a real-time drawing game with rooms, scoring, live chat, and a hybrid REST, TCP socket, and WebSocket architecture.
- **Tech:** FastAPI, Python sockets, WebSockets, React, SQLAlchemy, Redis.

AI-Assisted Student Helper

[GitHub](#)

- Combined PDF processing, semantic search, conversational Q&A, and flashcard creation in an AI-driven study companion.
- **Tech:** FastAPI, Python, MongoDB, Supabase, LLMs.

PMICS Administration Management System

[GitHub](#)

- Built an academic and financial administration platform for student, batch, and institutional operations.
- **Tech:** PostgreSQL, SQL, Next.js, Supabase.

Cafe Shop Management System

[GitHub](#)

- Developed a modular desktop application for orders, employees, billing, inventory, and reporting.
- **Tech:** Java, JavaFX, JDBC, FXML.

Minesweeper with Treasure Hunt

[GitHub](#)

- Created a C++/Qt Minesweeper game with multiple difficulty levels, story mode, flagging logic, and timers.

Languages

Bengali, English, Japanese (JLPT N5; basic conversation)
